

# Special topics in Logic and Security

2020-2021

Paul Irofti, Ioana Leuştean  
FMI, UB

# Organization

- The course has two parts:
  - 1 Static analysis (Paul Irofti)
  - 2 Specification and verification of security protocols (Ioana Leuştean)
- Exam
  - (a) Report for a project/scientific paper: teams with 2 members; the report will be checked using Turnitin; a list of papers/projects will be proposed for each part, a team will choose only one.
  - (b) Oral presentation of the report (slides, both team members should participate).
  - (c) Written exam (exercises)(optional, for 2 points).
  - (d) For [1] and [2] the maximum mark is 8(eight).
  - (e) Those who do not participate to the oral presentation are absent.
